Re: RISPLS Petition for the Removal of "Engineering Surveys" from the National Council of Examiners for Engineering and Surveying (NCEES) Model Law.

Dear Mr. Carter,

The New Hampshire Land Surveyor's Association (NHLSA) hereby joins the Rhode Island Society of Professional Land Surveyors (RISPLS) in their petition to remove the term "Engineering Surveys" and its definition from the NCEES Model Laws found at Chapter 110.20 Definitions, Section A, Paragraph 5.

We find the RISPLS petition letter dated August 22, 2011 to be extremely well researched with reasoned analysis, resulting in numerous valid points which warrant action. Our evaluation of the issue concludes that "Engineering Surveys" are neither appropriate nor justified in the current professional environment as articulated in the RISPLS petition letter.

The NHLSA Executive Committee voted unanimously on September 12, 2011 to support the RISPLS in this endeavor. We trust you will review this matter and conclude that the time has come to remove "Engineering Surveys" from the NCEES Model Law.

We would be happy to respond to any comments or inquiries you may have. Please contact us should you have any questions.

Respectfully Submitted,

New Hampshire Land Surveyor's Association

Kenneth C. Clinton, LLS/PLS
Government Affairs Director
